White Medical is the main Omron supplier into the NHS

Welcome to White Medical's latest brochure.

Who we are

White Medical are a family owned and run business, based in the Midlands.

Chris and Jane White started the company in November 1995 and worked tirelessly to introduce digital blood pressure monitors into the NHS and replace the mercury sphygmomanometer.

White Medical is a specialist supplier of diagnostic medical devices. We have never tried to be all things to all men and have focused on what we are good at. We know the products we sell! We supply, service and support! Not only do we support the products but we also support our customers; from putting the batteries in the right way round all the way up to installing software.

Quality Standards

The quality standards that White Medical have are UKAS accredited
ISO9001:2008, ISO13485:2003 & ISO14001:2001

These standards illustrate that White Medical's management systems are in place and audited annually by independent certification bodies. They ensure continued compliance and are recognised for their excellence.

Servicing and Warranty

All the details are at the end of the brochure but without going into too much detail, customers need to have a place where their devices can be serviced and their calibration checked. We can perform this service and have been trained by the manufacturer. In the rare occasion that a warranty claim is put forward we deal with it ourselves to turn the claim around and get the device back to the owner asap.

"the device looks after the customer, we support both!"

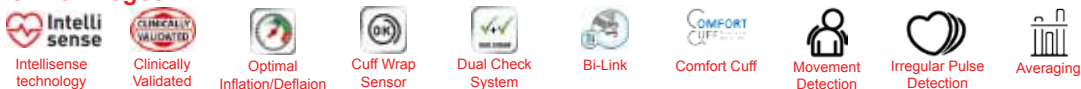

Our brochure is a snapshot of what we supply, for full details of our whole range please visit
www.white-medical.co.uk

If any amendments are made to this brochure an updated version can be found and downloaded here.
For special parts i.e. battery covers, fascias, buttons please contact us for product codes and pricing.

Omron M6 HEM-7211-E8(V) £45.00+VAT

This fully automatic blood pressure device provides the most comprehensive way to check for hypertension with dual check system

Fully automatic upper arm BPM
 Intellisense™ technology
 Dual check system
 Cuff wrapping guide
 Hypertension level indicator
 Irregular heartbeat and body movement detection
 Memory capacity for 90 readings
 Advanced averaging mode
 Clinically validated (International Protocol & BHS)
 Large and small cuffs available

OMRON

M6 Packages:

M6 - Package 1	Omron M6 supplied with standard cuff only	£45.00
M6 - Package 2	Omron M6 supplied with standard and large cuffs	£54.00
M6 - Package 3	Omron M6 supplied with standard and small cuffs	£54.00
M6 - Package 4	Omron M6 supplied with standard, small and large cuffs "three cuff version"	£63.00

Omron M6 Comfort HEM-7221-E8(V) £50.00+VAT

Fully automatic upper arm BPM
 Intellisense™ technology
 Supplied with comfort cuff (22-42cm upper arm circumference).
 Small (CS2) and large (CL2) cuffs are not compatible.
 Dual check system
 Cuff wrapping guide
 Hypertension level indicator
 Irregular heartbeat and body movement detection
 Memory capacity for 90 readings
 Advanced averaging mode
 Clinically validated (International Protocol & BHS)

Omron M3 HEM-7200-E8(V) £36.00+VAT

This fully automatic blood pressure device provides an easy way to check for hypertension. Its Intellisense™ technology and cuff wrapping guide ensure accuracy and comfort for every single measurement.

- Fully automatic upper arm BPM
- Intellisense™ technology
- Cuff wrapping guide
- Hypertension level indication
- Irregular heartbeat detection
- Body movement detection
- Memory capacity for 60 readings
- Advanced averaging mode
- Clinically validated (International Protocol)
- Large and small cuffs available

Omron MIT Elite HEM-7300-WE7 £64.00+VAT

- Fully automatic upper arm BPM
- Intellisense™ technology with fast measurement on inflation
- One-button operation
- 90 memories with date/time indication
- Detects and displays irregular heartbeats as well as body movement
- Hypertension indicated by symbol on display
- Clinically validated (International Protocol - BHS approved)

BHS APPROVED

VALIDATED FOR PREGNANCY

Omron MIT Elite Plus HEM-7301-ITKE7 £76.00+VAT

- Fully automatic upper arm BPM
- Intellisense™ technology with fast measurement on inflation
- One-button operation
- 90 memories with date/time indication
- Detects and displays irregular heartbeats as well as body movement
- Hypertension indicated by symbol on display
- Clinically validated (International Protocol - BHS approved)
- PC connectivity USB-cable and software supplied with the unit
- Backlit display

Omron M10-IT HEM-7080IT-E £60.00+VAT

Fully automatic blood pressure monitor with Intellisense. Irregular pulse detection.
Dual sized comfort cuff (22-42cm).
Small (CS2) and large (CL2) cuffs are not compatible.
Two user monitor with guest mode.
'Auto' mode for 3 consecutive readings.
Twin 84 reading memory with date and time stamp.
Averaging: morning, evening and 'Auto' measurements.
Clinically validated BHS & International Protocol.
MS Windows PC connectivity with Omron's Health Management Software, USB cable included.

Omron 705IT HEM-759-E £99.00+VAT

Fully automatic blood pressure monitor with Intellisense technology.
28 Memory capacity.
Clinically validated to International Protocol.
Bio Information Link BI functionality for easy transfer of data to PC (Windows only).
Supplied with specific USB cable and software (Windows only).
Optional printer available for hard copies of results.

Omron 705CP-II HEM-759P-E2 £90.00+VAT

Fully automatic blood pressure monitor
Intellisense technology.
28 Memory capacity.
Clinically validated to International Protocol.
Supplied with a mini printer for results in hard copy and one paper roll.
Bio Information Link BI functionality (optional USB cable and software available) for easy transfer of data to PC (Windows only).

Omron i-C10 HEM-7070-E £51.00+VAT

Fully automatic upper arm blood pressure monitor.
 Intellisense technology for controlled inflation and deflation.
 Morning Hypertension detection and irregular Heartbeat detection.
 Built in cuff compartment with protective cover for buttons and display.
 Dual sized Comfort Cuff (22-42 cm).
 Small (CS2) and large (CL2) cuffs are not compatible.
 Twin 84 reading memory with date and time stamp.
 Auto Mode for 3 consecutive measurements.
 Average Mode: Morning, Evening and Auto Measurements

Omron M7 HEM-780-E £55.00+VAT

Fully automatic upper arm blood pressure monitor.
 Intellisense technology for controlled inflation and deflation.
 Comfort cuff fits 22 to 42 cm arm sizes.
 Small (CS2) and large (CL2) cuffs are not compatible.
 90 memory capacity with date and time.
 Clinically validated BHS approved International Protocol
 Suitable for use during pregnancy.

Omron M2 HEM-7117-E £25.00+VAT

Fully automatic upper arm BPM
 Intellisense™ technology
 Hypertension indication
 Irregular heartbeat detection
 Memory capacity for 21 readings with date and time stamp
 Advanced averaging mode
 Clinically validated (IP)

Omron M2 Basic HEM-7116-E £23.00+VAT

Fully automatic blood pressure monitor.
 Intellisense technology.
 Last reading memory.
 One button operation.
 Measurement out of range indicator.

Omron M1 Compact HEM-4022-E £30.00+VAT

Semi automatic Blood pressure monitor PM.
Manual inflation and automatic deflation.
Irregular Heartbeat detection.
Memory capacity for 14 memories.
One button operation.

Omron R7 HEM-637IT-E7 £72.00+VAT

Fully automatic wrist blood pressure monitor, clinically validated (International Protocol)
Intellisense™ technology and advanced position sensor.

Detects and displays irregular heartbeats and body movement

Graphical charting display to illustrate long term monitoring of blood pressure.

Bio Information (BI) functionality for PC or printer connection. Optional portable printer.

90 memory capacity with date and time stamp.

Cuff fits 13.5 – 21.5 cm wrists

Averaging mode

Omron R6 HEM-6052-E £60.00+VAT

Fully automatic wrist blood pressure monitor, clinically validated (International Protocol)
Intellisense™ technology and advanced position sensor.

Detects and displays irregular heartbeats and body movement

Dual 90 memory capacity with date and time stamp

Cuff fits 13.5 – 21.5 cm wrists

Averaging mode

Hypertension level indicator

Omron R3 HEM-6200-E £36.00+VAT

Fully automatic wrist blood pressure monitor, clinically validated (International Protocol)
Intellisense™ technology

Detects and displays irregular heartbeats and body movement

Memory capacity for 60 measurements with date and time stamp

Cuff fits 13.5 – 21.5 cm wrists

Averaging mode

Hypertension level indicator

Omron R2 HEM-6113-E £32.00+VAT

Fully automatic wrist blood pressure monitor, clinically validated (International Protocol)
Intellisense™ technology

Memory capacity for 30 measurements with date and time stamp

Hypertension indicator

Cuff fits 13.5 – 21.5 cm wrists

Omron M24/7 BP5 £1099.00+VAT

OMRON M24/7 Ambulatory Blood Pressure Monitor

Accurate Blood Pressure Monitoring around the clock

Get a more detailed blood pressure profile on your patient

For better diagnosis, evaluation and therapy

Fully automatic ambulatory blood pressure monitor

Measurement capacity for 48 hrs

Memory capacity of more than 400 readings.

Lightweight design and quiet operation for patient compliance.

Large LCD display for easy reading.

BHS clinically validated.

Fully programmable with windows software for full analysis and data management.

Free installation and training provided.

Two year warranty.

Includes standard cuff (24-32cm) and large neoprene latex-free cuffs with hand-washable sleeve, blood pressure tracker software for PC, optical USB PC cable, carry pouch and batteries.

Optional extras are available, extra large cuff (42-54cm), small cuff (17-22cm), cuff barriers for infection control and extra sleeves for cuffs, tubing and replacements for all cuff sizes.

Omron Heartscan HCG-801-E £215.00+VAT

The HeartScan HCG801 senses the heart waveform and indicates potential ECG abnormalities.

Excellent pocket sized screening tool.

Simple operation with fast results in 30 seconds.

Results show easily understandable waveform with a selection of 12 interpretive messages on the large screen.

Easy application (no electrodes or leads).

A 30 second recording can be made when symptoms occur whether in the hospital, surgery or at home.

Omron Heartscan Initial Unit HCG-801-E(IU) £430.00+VAT

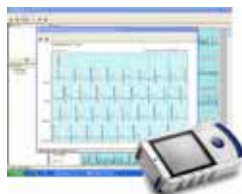

Heartscan as above supplied with a SD card reader and ECG viewer software.

Only one Initial Unit purchase is required for multiple software installs and ECG usage.

ECG viewer software enables easy transfer of waveform data to MS Windows PC, adjustment of waveform scale for clearer analysis and printing of waveform data for inclusion in patient notes.

Requirements: MS Vista, XP SP2 or Win 2000 SP4, 128Mb Ram, 32Mb hard-disk space (more for storage of ECG Data) and spare USB port.

Software (HCG-EXT1) can be purchased separately.

A&D TM-2430 £1130.00+VAT**Ambulatory Blood Pressure Monitor**

- 24 hour ambulatory blood pressure monitor.
- Clinical validated to BHS (A/A grade).
- Supplied with standard and large cuffs.
- Oscillometric measurement method (automatic or manual).
- Light weight & compact size (215g).
- Multiple measurement intervals (user configurable).
- Automatically adjusts: Proper Cuff Pressure, exhaust & end of measurement.
- Battery Power (3 alkaline or Ni-Cad "AA").
- Per patient configuration via included Dr Pro software.
- Data output to computer or printer via RS-232 connectivity.

A&D TM-2655P £1785.00+VAT**Waiting Room Monitor****A&D Arm-In Waiting Room Blood Pressure Monitor**

The TM-2655P is a fully automatic blood pressure supplied with the stand, which enables patients to take their own blood pressure, without the support of GP/hospital staff. This achieves efficient, quality treatment for patients and lightens the load of clinical staff. The built-in thermal printer automatically produces a hard copy so patients can take their results to the GP/nurse who can then attach them to their notes.

- Left or right arm measurement. Clinically validated to the BHS Protocol.
- Easy to use, one touch of the START button. Cuff inflation level is set automatically.
- Displays systolic, diastolic and pulse rate simultaneously.
- Four different printout formats on wide 58 mm/w paper.
- Auto-cutter eliminates paper jams. Date & time is shown on each printout.
- Energy saving mode approximately 3 minutes after the last measurement.
- Infra-red sensor automatically turns the power back on when a patient sits at the unit.
- Twin RS-232C ports as standard.

**A&D AD-6121A £399.00+VAT**

- Class III approved precision weighing scale.
- 150kg capacity with 100g resolution with tare function.
- Very low profile (57mm height) with rugged construction.
- Only 3kg with built-in handle for easy transportation.
- Back-lit with 180 degree display rotation for ease of professional use.
- RS232 connection enables connection to TM-2655P for print-out of weight measurement.

Combine the 2655P with the 6121A for a "patient use" blood pressure and weight measurement station.

A&D UA-789XL £120.00+VAT

Supplied with Extra Large Cuff
40-60 cm upper arm circumference

Patients with large arms now have a reliable and easy way to take measurements on a digital blood pressure monitors without needing specialist equipment with the UA-789XL. Designed with our larger population in mind the UA-789XL has new, high performance inflation technology to give speedy and comfortable inflation.

Extra Large 42-60cm upper arm circumference.

Large 32-45cm cuff can also be used (not standard & small).

High power pump for quick inflation.

60 measurement memory

Average facility with time & date.

WHO blood pressure classification indicator.

IHB indicates irregular heartbeat occurrence.

5 year warranty.

A&D UA-767PC £99.00+VAT

The ever popular UA-767 with IT functionality via RS232 port(Smart USB cable included).

Automatic digital blood pressure monitor with 4 Preset levels(150, 180, 210, 240).

Advanced oscillometric measurement.

Easy one button operation.

Clinically validated to BHS highest grade (A/A).

280 Measurement memory.

Supplied with std adult nylon cuff (22-32cm) batteries and case.

Doctor Pro 3 BP Analysis Software can be used, refer to TM-2430.

A&D UA-767NFC £58.00+VAT

The next generation in connected health technology, NFC is a simple to use wireless communication standard which transfers the measurement results to an NFC enabled smartphone (App required) or NFC enabled computer with transfer software.

Fully automatic digital blood pressure monitor with NFC.

Clinically validated.

Irregular heartbeat indicator.

100 measurement memory with date and time (for use with data transfer, cannot be reviewed on the unit).

NFC Data Transfer (smartphone with A&D Wellness Connected™ app):

NFC enabled smartphone and App required, currently Android only.

FREE A&D Wellness Connected™ app available from the Google Play store, or by scanning the QR code.

A&D UA-1010 £42.00+VAT

New functions to guide the user to more accurate measurements.
 Irregular heartbeat indicator.
 New latex-free and metal-free SlimFit cuff (22-32cm).
 90 measurement memory with averaging (ALL, AM, PM).

 Individualised monitoring with more comfort.
 Newly designed SmoothFit Cuff(17-32cm), enables more comfortable measurement.
 MyPressure mode enables either full automatic measurement or preset inflation to your chosen level.
 TriCheck™ mode automatically takes three consecutive measurements at one minute intervals and displays the average.
 90 measurement memory with averaging (ALL,AM,PM).
 World Health Organisation(WHO) BP classification indicator.
 Cuff fit error indicator.
 Movement detection indicator.
 Irregular heartbeat indicator.
 Supplied with SmoothFit adult cuff (17-32cm), 4 x AA batteries, full instructions, storage case and 5 year warranty.

A&D UA-787Plus £58.00+VAT

Smooth fast measurement with advanced fuzzy logic.
 Multi fit e-Cuff for std and large arms (22-43cm).
 WHO blood pressure classification indicator.
 Irregular heartbeat (IHB) indicator.
 60 measurement memory + average (timed and dated).
 Clock feature with alarm settings.

**A&D UA-774 £52.00+VAT**

Fully automatic upper arm blood pressure monitor.
 Two user monitor with illuminated start 1 and 2 buttons.
 Dual 30 measurement memory with average function.
 WHO BP classification indicator.
 Irregular heartbeat (IHB) indicator.
 Supplied with slimfit comfortable cuff (22-32cm).

**A&D UA-767 Plus 30 £45.00+VAT**

Fully automatic upper arm monitor.
 One touch operation with illuminated start button.
 30 measurement memory + average reading.
 WHO BP classification indicator.
 Irregular heartbeat (IHB) indicator.

**A&D UA-767 Plus £42.00+VAT**

Fully automatic upper arm monitor.
 One touch operation.
 Last measurement recall.
 WHO BP classification indicator.
 Irregular heartbeat (IHB) indicator.

**A&D UA-767 £41.00+VAT**

Automatic digital blood pressure monitor.
 Four preset inflation levels(150, 180, 210, 240).
 Advanced oscillometric measurement.
 Clinically validated measurement technology.
 Clear three line display of Sys, Dia and pulse.
 Supplied with slimfit comfortable cuff (22-32cm).

**A&D UA-782 £52.00+VAT**

Fast, silent and comfortable measurement.
 Clinically validated to ESH protocol.
 Soft cuff for 17-32 cm arm circ (small / standard adult).
 Irregular heartbeat & WHO BP classification indicator.
 90 measurement memory with averaging.
 Tidy heart shaped cuff holder (detachable).

**A&D UA-705 £27.00+VAT**

Semi automatic blood pressure monitor.
 Compact desk monitor.
 Slim fit comfortable cuff.
 Irregular heartbeat feature.
 WHO BP classification indicator.

**A&D UA-704 £25.00+VAT**

Semi automatic blood pressure monitor.
 Palm top monitor.
 Slim fit comfortable cuff.
 Irregular heartbeat feature.

**A&D UM-101 £110.00+VAT**

Digital manometer, no mercury.
 Auscultatory measurement.
 Clear LCD display with pressure level marker and digital pulse readout.

A&D UA-851 £41.00+VAT

90 measurement memory plus average reading.
 Irregular heartbeat indicator and WHO BP classification indicator.
 Fast, nearly-silent inflation with illuminated start button.
 SlimFit comfortable cuff (22-32cm). Supplied with storage bag & batteries.

A&D UA-853 £58.00+VAT

Same specification as UA-851 with the addition of a clock display with 3 alarms.

A&D UA-855 £114.00+VAT

Same specification as UA-853 with the addition of the following features:
 Graphical blood pressure classification indicator.
 Coloured LED indicator.
 Histogram display for stored measurement data.
 Two person 120 measurement memory each timed, AM and PM, dated.
 Room temperature recorded.
 Average readings shown in graphic format options weekly/monthly/all.
 Supplied with a multi-size e-Cuff (22-43cm) and storage box.

A&D/CUFF-XL	Extra large cuff for UA-789XL	£25.00

The next generation in connected health technology, NFC is a simple to use wireless communication standard which transfers the measurement results to an NFC enabled smartphone (App required) or NFC enabled computer with transfer software.

A&D UA-767NFC £58.00+VAT

Fully automatic clinically validated digital blood pressure monitor with NFC.
Irregular heartbeat indicator.
100 measurement memory with date and time (use with data transfer, not viewable on the scale)..

A&D UC-324NFC £77.00+VAT

Automatic digital precision health scale with NFC, Just step-on, wait for measurement, step-off
100 measurement memory with date & time (use with data transfer, not viewable on the scale).
Measurement in kg/lb. Capacity: 10-150 kg/22-330 lb.
Graduation: 0.05 kg <100 kg> 0.1 kg/0.1 lb.

A&D UW-101NFC £40.00+VAT

Activity monitor (step counter / pedometer) with NFC.
3-axis accelerometer for motion detection.
Activity strength indicator (slow-fast).
No of steps: (0-99999). Calories burned: (0.0-9999.9 kcal). Distance: (0.00-999.99 km).
14 days memory (viewable on activity monitor and for use with data transfer).

NFC Data Transfer (smartphone with A&D Wellness Connected™ app)

NFC enabled smartphone and App required, currently Android only.
FREE A&D Wellness Connected™ app available from the Google Play store, or by scanning the QR code.

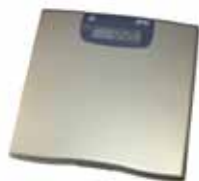

A&D UA-767PCHV £99.00+VAT

The ever popular UA-767 with IT functionality via RS232 port(Smart USB cable included).
Automatic digital BP monitor with 4 preset inflation levels (150, 180, 210, 240).
Clinically validated to BHS highest grade (A/A).
280 Measurement memory.
Compatible with Doctor Pro 3 BP Analysis Software.

A&D UC-321PLHV £124.00+VAT

Precision weighing scale, 200Kg capacity with 100g resolution.
Easy one button operation and automatic power-off.
Child / small animal measurement function.
Battery life: approx 1000 measurements.
RS232C communication port. Smart USB data transfer cable supplied.
Data transfer to HealthVault requires connection to PC at time of measurement.

Microsoft® HealthVault™ is a privacy- and security-enhanced online service designed to put you in control of your health information. HealthVault helps you gather and store health information from various sources and share information with those you trust.

Visit www.HealthVault.co.uk to learn more.

These devices can connect with HealthVault, a trusted place for people to organize, store, and share health information online.

Omron M10-IT HEM-7080IT-E £60.00+VAT

Fully automatic clinically validated blood pressure monitor with Intellisense.
Irregular pulse detection.
Dual sized comfort cuff (22-42cm).
Two user monitor and guest mode. Twin 84 memory with date and time stamp.
'Auto' mode for 3 consecutive readings.
Averaging: morning, evening and 'Auto' measurements.
Clinically validated BHS & International Protocol.
Supplied with Omron's Health Management Software for MS Windows & USB cable.

Omron MIT Elite Plus HEM-7301-ITKE7 £76.00+VAT

Fully automatic clinically validated upper arm blood pressure monitor
Intellisense™ technology with fast measurement on inflation
Backlit display One-button operation
90 memories with date/time indication
Detects and displays irregular heartbeats and body movement
Hypertension indicated by symbol on display
PC connectivity USB - cable and software supplied with the unit

Omron R7 HEM-637-E2 £90.00+VAT

Fully automatic wrist blood pressure monitor, clinically validated (International Protocol)
Intellisense™ technology and advanced position sensor.
Detects and displays irregular heartbeats and body movement
Graphical charting display to illustrate long term monitoring of blood pressure.
Bio Information (BI) functionality for PC or printer connection. USB cable included.
90 memory capacity with date and time stamp. Averaging mode

The use of these Omron devices with HealthVault requires a PC with Microsoft® Windows XP SP2 (minimum). Full specification at www.healthvault.co.uk

Omron M24/7 BP5 £1099.00+VAT**OMRON**
All for Healthcare

The Omron M24/7 offers doctors the opportunity to complement their current treatment therapy for hypertensive patients by monitoring them away from the surgery for up to 48 hrs.

Lightweight design and quiet operation for maximum patient compliance

More than 400 measurements stored in memory

Measurement capacity for 48 hours

Clinically validated by the British Hypertension Society

Provided with two latex free cuffs (medium 24-32cm & large 32-42cm)

Windows based BP Tracker software for easy set up and analysis of results

Further details available at www.white-medical.co.uk or call to arrange a demo.

A&D TM-2430 £1130.00+VAT**A&D**
A&D MEDICAL

24 hour ambulatory blood pressure monitor.

Clinical validated to BHS (A/A grade).

Automatically adjusts: Proper Cuff Pressure, exhaust and end of measurement.

Supplied with standard and large cuffs.

Oscillometric measurement method (automatic or manual).

Light weight & compact size (215g).

Multiple measurement intervals (user configurable).

Battery Power (3 alkaline or Ni-Cad "AA").

Per patient configuration via included Dr Pro software.

Data output to computer or printer via RS-232 connectivity.

Riester ri-cardio £875.00+VAT**Riester**

24 hour ambulatory blood pressure monitor.

Clinical validated to BHS (A/A grade).

Motion tolerant technology to maximise measurement success.

Programmable measurement intervals. (5, 10, 15, 20, 30, 45, 60, 90 and 120 minutes)

Supplied with standard and large cuffs. (25 - 35cm & 33 - 40cm arm circ)

Oscillometric measurement with incremental deflation.

Weighs approx 236g including batteries.

Battery power (2 alkaline or Ni-Cad "AA").

Machine washable cuffs with removeable bladders.

Patented elastic cuff to minimise slipping.

Dimensions: 125mm x 70mm x 33mm.

Supplied with software CD (Windows), 2x cuffs, carry case and belt,

USB cable, 4 x AA batteries and 2 year warranty.

Small and XL cuffs optional range from 18 - 46cm.

Microlife WatchBP-03 £858.00+VAT

microlife®

Dual Operation Modes:

24Hr ABPM mode - Fully programmable 24 Hour measurement for fast and accurate out-of-office blood pressure measurement.

7-Day SBPM mode - Collect multi-day blood pressure data for use in initial hypertension assessment as well as on-going treatment assessment.

Fully programmable using WatchBP analyser software.

Reports generated in PDF and Excel formats.

Transmit BP Data to any PC via USB connectivity.

Supplied as standard with medium cuff (22-32cm), large cuff (32-42cm), various length cuff tubes, tube holder, USB cable, pouch, shoulder strap, shoulder sling, anchor strap, waist belt and batteries.

Small (17-22cm) and XL (42-52cm) cuffs available separately.

Microlife WatchBP Home A £89.00+VAT

Twin Mode Monitor:

Usual Mode - Standard single measurement mode with 250 measurements stored in memory.

Diagnostic Mode - 7 day SBPM measurement program, duplicate morning and evening measurements taken on each of the 7 days prior to the next physician visit.

Atrial Fibrillation (AFIB) detection, indicator displays when detected during measurement.

PC Connectivity via USB transmits blood pressure data to PC using included WatchBP Analyzer Home software.

250 measurement memory with date / time and average of all measurements.

WatchBP®

The full WatchBP range is available to view at www.white-medical.co.uk

Microlife WatchBP Office AFIB £858.00+VAT

WatchBP Office AFIB automatic blood pressure monitor follows the guidelines of the ESH, AHA and WHO.

Triple Mode Monitor:

ROUTINE - Two fully automated measurements on the patient's preferred measurement arm only.

AUSCULTATION - Use the WatchBP Office as a digital manometer and take the blood pressure reading in the traditional fashion using a stethoscope.

SCREEN - Fully automated triple measurement on both arms simultaneously to determine preferred arm for future measurements, as recommended by ESH/AHA.

Preset inflation pressure for AUSCULTATION mode configurable from 140 - 280 mmHg (20 mmHg steps).

Inflation pressure for ROUTINE & SCREEN modes automatically determined by fuzzy logic.

Measurement delay and interval for ROUTINE mode configurable to 15/30/45 or 60 seconds.

Measurement delay and interval for SCREEN mode fixed at 60 seconds.

AFIB detection in SCREEN mode only.

Hide function to remove measure inflation pressures.

Mean Arterial Pressure (MAP) and Pulse Pressure (PP) values displayed during measurement review.

Supplied with main unit, 2x std adult cuff(22-32 cm), 2 x large adult cuff(32-42 cm), mains adaptor, rechargeable battery pack and full instructions.

Nissei DM-3000 £249.00+VAT

DELUXE DESK TOP BP MONITOR MANUAL OR AUTOMATIC MEASUREMENTS

Dual Mode - Oscillometric (fully automatic) or auscultatory (manual)
 Supplied with standard & large washable cuffs, battery pack and mains adaptor.
 Clinically validated to BHS approved International Protocol.
 7 memory capacity (Oscillometric measurements only).
 Use with AC adaptor or rechargeable battery (supplied).
 Large graphic display with digital and column readings.
 Inflation by electronic pump or manually with inflation bulb.
 Preset inflation for per patient control.

Nissei DM-1000 £83.00+VAT

PREMIER MODEL MANUAL MEASUREMENT

Digital "manual" sphygmomanometer in a traditional column design.
 Large clear backlit LCD display with 1mmHg graduations.
 Display HOLD facility - blood pressure measurement can be confirmed on the bar LCD after measurement using the HOLD button.
 Supplied with standard cuff and 2 x AA batteries.

Nissei DM-500 £70.00+VAT

BASIC MODEL MANUAL MEASUREMENT

Digital "manual" sphygmomanometer in a traditional column design.
 LCD display with 2mmHg graduations.
 Display HOLD facility - blood pressure measurement can be confirmed on the bar LCD after measurement using the HOLD button.
 Supplied with standard cuff and 2 x AA batteries.

Nissei DSK-1011 £34.00+VAT

Fully automatic upper arm blood pressure monitor.
 Upper arm measurement on inflation.
 Clinically validated to ESH IP2010
 Dual 60 measurement memory with date and time
 Personal Mode: inflation is adjusted based on the last three measurements selected memory bank
 WHO blood pressure classification chart
 Irregular pulse rhythm and body motion detection

Nissei DSK-1031 £37.00+VAT

Fully automatic upper arm blood pressure monitor.
 Upper arm measurement on deflation using fuzzy logic.
 Clinically validated to ESH IP2010
 Dual 60 measurement memory with date and time
 WHO blood pressure classification display
 Cuff wrapping sensor
 Reliability indicator - optimum measurement condition
 Irregular pulse rhythm and body motion detection

Nissei DS-1902 £33.00+VAT

Automatic Upper Arm blood pressure monitor.
Measurement on inflation.
22-42cm circumference cuff.
Dual 30 measurement memory.
Averaging - date & time indication.
Irregular pulse rhythm indication.
Carry case and batteries included.

Nissei DS-1873 £36.00+VAT

Fully Automatic BPM
Dual 30 measurement memory.
22 - 32cm arm circumference.
Large clear LCD display.
Integrated cuff holder.
Carry case and batteries included.

Nissei DS-400 £25.00+VAT

Semi-Automatic blood pressure monitor.
Manually Inflated
Compact size economy model.
Suitable for use during pregnancy.
30 Measurement memory plus average.

Nissei HT-1500 £20.00+VAT

Integral aneroid sphygmomanometer.
Compact and lightweight.
Economically priced.
One touch trigger operation.
Supplied with std adult cuff and bag.

Nissei WSK-1011 £32.00+VAT

Wrist blood pressure monitor, fuzzy-logic inflation
Irregular pulse rhythm and body motion detection
Dual 60 measurement memory
Clinically validated to ESH IP2010
12.5 to 21.5cm wrist circumference.
WHO blood pressure classification chart

Nissei WS-820 £36.00+VAT

Automatic wrist blood pressure monitor.
Irregular pulse rhythm detection.
12.5 to 21.5cm wrist circumference.
Dual 30 measurement memory
Average with date and time.

Riester big ben from £58.00+VAT

The Riester Big Ben aneroid sphygmomanometer is a high quality, cost effective, sturdy device that effortlessly copes with the day to day wear and tear in primary and secondary care. Whether desk, wall or trolley mounted, round or square, the attractive design in a top-quality finish provides a pleasant atmosphere for doctors and patients in all surroundings.

6 inch face either square or round aneroid sphygmomanometer.

Easy to read, scale up to 300 mmHg.

Spacious basket on the reverse for tubes and cuffs.

Non-wearing air-release valve with fine adjustment.

Micro-filter to protect the release valve and measurement system.

Specially hardened copper-beryllium membrane, which is resistant to aging and can withstand pressures of up to 600 mmHg.

Precision mechanism mounted on a special support, in order to ensure complete stability of the measuring system and the zero-point.

Supplied with 3m coiled tubing, bulb and washable twinned tube adult cuff.

No zero-point fixation required.

Maximum error tolerance: ± 3 mmHg.

Complete range of cuff sizes available from infant up to adult thigh.

Rigid tip thermometer.
Unique flat tip sensor.
Oral, axillary & rectal use.
60 second response.
Beeper.
Water resistant.
Last memory recall.
Auto switch off.
°C or F reading to 1 dp.

Digital probe covers available for pen thermometers, 100 per box, product code 9511254-4, cost £2.45+VAT.

Riester Ri-Fox N 1902 £74.00+VAT

Small, mobile device with integrated sensor.
Bright LED illumination for good visibility.
LED-display of %SpO2, perfusion and pulse.
SpO2 measurement range: 70-99%
Battery lifetime of approx. 30 hours (in continuous operation)
2 x AAA-batteries included
Automatic switch-off after 8 seconds

Riester

Nissei BO-600 £99.00+VAT

Small, lightweight, water resistant Oximeter for reading SpO2 anytime, anywhere.
Clear backlit LCD display.
Automatic power on/ off with insertion and removal of finger.
Reliable, accurate SpO2 and pulse reading in seconds.
Upto 4800 spot measurements on two AAA batteries.
Dimensions(LxWxH): 58x35x32mm and only 35g (approx)
Comes with lanyard and batteries. ISO 9919:2005 Compliant.

NISSEI

Nonin 9590 Onyx Vantage £149.00+VAT

Replaces Nonin Onyx 9500

A cost effective solution for spotchecks and short-term monitoring.
Easy to use with patented Auto ON / OFF when finger is inserted / removed.
Easily positioned on a wide range of finger, thumb or toe sizes from child to adult.
Unique pulse quality indicator (Green, Amber, Red).
Compact enough to carry at all times and weighs less than 60g.
Upto 6000 spot checks from two AAA batteries which are supplied.
Clear LED display can be read in any environment, from any angle.
Available in four colours (Black, Blue, Red, Purple).
Field-tested for durability in the toughest environments.

NONIN

Nonin 9550 Onyx II £229.00+VAT

Easy to use with patented Auto ON / OFF when finger is inserted / removed.
Easily positioned on a wide range of finger sizes from child to adult.
Unique pulse quality indicator (Green, Amber, Red).
Compact enough to carry at all times and weighs only 60g.
5000 spot checks from two AAA batteries which are supplied.
Clear LED display can be read in any environment, from any angle.
Field-tested for durability in the toughest environments.

Nonin 9560 Onyx II with Bluetooth £399.00+VAT

Onyx II Bluetooth pulse oximeter

Based on the top selling Onyx II 9550.
Bluetooth 2.0 technology.
Compatible with Bluetooth HDP, IEEE 11073 and Continua connection standards.
Long range wireless connection upto 100m.

All Nonin Pulse Oximeters are ISO9919:2005 Compliant

Nonin 8500 Series from £349.00+VAT

Suitable for spot checks or continuous monitoring.
 Compatible with Nonin's full range of Purelight Sensors.
 Durable and rugged construction for performance in the toughest environments.
 Pulse quality indicator gives easily interpreted tri-colour representation of signal quality.
 Operates on Six AA Alkaline batteries (included).
 100 hours continuous use - longest on the market.
 18 hour memory (available on 8500M model only).
 ISO 9919:2005 Compliant, the International Standard for Pulse Oximeters.

Product Code	Description	Price
8500	Nonin 8500 Handheld Pulse Oximeter.	£349.00
8500M	Nonin 8500M Handheld Oximeter with Memory.	£399.00

Mindray PM-50 £199.00+VAT**mindray™**

Hand held pulse oximeter for efficient & accurate patient monitoring.
 Spot check mode
 Suitable for adult, paediatric and neonatal patients.
 Convenient size and weight for spot check monitoring.
 Automatic standby and power-off.
 Stores up to 100 patient IDs and 200 measurements.
 Data transfer capable to PC for storage or printing.
 Convenient AA size alkaline or rechargeable batteries.
 Supplied with Mindray adult reusable SpO₂ sensor and neckstrap.

Mindray PM-60 £299.00+VAT

Hand held pulse oximeter for efficient & accurate patient monitoring.
 Suitable for adult, paediatric and neonatal patients.
 Spot check and continuous mode options.
 High resolution 2.4" color LCD display.
 Two selectable working modes: spot check & continuous monitoring.
 Adjustable audible and visual alarms.
 Real time data transfer by infrared technology.
 Batteries to support up to 36 hour continuous working (not supplied).
 Supplied with Mindray adult reusable SpO₂ sensor clip and neck strap.
 Data management kit, battery charging kit and carry cases available.
 Full details available at www.white-medical.co.uk

mindray™

Mindray VS-800 from £580.00+VAT

Vital Signs Monitor suitable for adults, paediatrics & neonates.

High resolution 3.4" LCD for option settings, measurement review and SpO₂ pleth waveform.

Adjustable audible and visual alarms.

Rechargeable Li-ion battery (8 hour charge, 10.5 hour use).

Easy carrying handle and full mounting solutions available

Powerful Data Storage and Management, store and view patient data.

Total storage capacity for 100 patient IDs; 1200 sets of data for each parameter.

NIBP: Sys, Dia, MAP and Pulse, mmHg or kPa.

SpO₂: Percentage, heartrate and audible visual pulse beat.

TEMP: °C or °F with mode (Oral, Axillar, Rectal) display, predictive or monitor mode indicator.

Seca CTCardioPAD touchscreen £3104.00+VAT

Revolutionary new ECG with full touch screen technology

Simply touch the large 10,4" high resolution colour display to record, select and print the highest quality ECG's faster than you can imagine

Advanced processing, Instant start-up provides immediate availability, ECG processed, interpreted and printed in less than 3 seconds

Lightweight and portable, together with the high capacity battery, allows easy transport of the seca CTCardioPad

The screen is able to clearly display all 12 leads at the same time

High quality built-in thermal printer

Get complete clinical information with the interpretation software

Capture and store 5 minutes of uninterrupted 12 lead data to document intermittent arrhythmias

High volume internal memory – storage of up to 350 ECG's

Stored ECG's can be exported to EMR/HIS in a variety of formats: XML, PDF, DICOM

Full specification available at www.white-medical.co.uk

seca

Seca CT320 usb connectivity £1512.00+VAT

The interface is easy to use and the ECG recording can be viewed, printed and archived into the practice's Patient Record system and viewed throughout the practice

High quality recordings (up to 4000Hz sampling) of all twelve leads for viewing, printing or comparison with previous tracings. Complete with ECG interpretive software

Paperless ECG records, if hard copy is required, the ECG can be printed in a choice of formats complete with grid onto plain A4 copier paper

Data can be attached to all leading Patient Record systems

Seca CT320 supplied with USB connection cable, alligator clips, 500 seca Q-trace disposable electrodes, full length patient cable and seca cardio software (no licence fees)

Seca CT321 bluetooth connectivity £1763.00+VAT

PC based interpretive ECG Machine with Bluetooth connectivity

Innovative Medical Bluetooth Technology removing the need for a USB cable connection, allowing greater flexibility in large clinic rooms.

Same ECG functionality as Seca CT320.

Seca CT321 supplied with patient cable, alligator clips, 500 disposable electrodes, seca cardio software (no licence fees), bluetooth dongle, 2 rechargeable lithiumion batteries and battery charger.

Seca CT3000i interpretive £1092.00+VAT

12 lead, 3 Channel ECG with high quality interpretive programme.

Auto-start button automatically produces ECG traces complete with rhythm strip, measurements and interpretation.

Filters for baseline, electrical & muscle tremor interference.

Lead off warning and identification.

12 simultaneously acquired ECG traces printed on 90 mm paper, eliminates trace overlap.

Manual button provides real time print-outs.

Mains and battery operation, 4 hour usage from full charge.

Supplied with mains cable, patient cable, pack of z-fold paper, 500 disposable electrodes and alligator clips.

seca

Seca CT6i interpretive £1508.00+VAT

- 12 Channel ECG with high quality interpretive programme.
- Choice of up to 12 leads per page or the popular 4 x 3 leads plus rhythm strip, intervals and interpretation on one A4 page.
- Auto-start one touch operation or manual real time.
- Large A4 paper tray providing up to 240 ECG pages.
- Mains and battery operation, up to 400 ECGs from full charge.
- 12 lead simultaneous acquisition with lead off warning and identification.
- Interference filters for baseline drift, electrical interference and muscle tremor.
- Copy button for extra traces.
- Supplied with mains cable, patient cable, pack of z-fold paper, 500 disposable electrodes and alligator clips.

seca

Seca CT8000i interpretive £1512.00+VAT

- 12 lead, 3 Channel high quality interpretive ECG with LCD screen and alpha-numeric keyboard.
- Choice of both internal and external print formats (via integral port), including automatic rhythm strip.
- Internal memory for up to 45 stored ECG records.
- High quality adult and paediatric interpretive software.
- Digital filters for mains, base line and muscle tremor additional advanced filters (SSF and SBS) for clear traces.
- Dedicated soft keys for ease of storing, printing and transmitting.
- Optional communication module (built-in Lan and modem connections).
- Supplied complete with mains cable, internal rechargeable battery, patient cable, pack of z-fold paper, 500 disposable electrodes and alligator clips.

Seca CT8000P interpretive £2264.00+VAT

- 12 Channel high quality interpretive ECG with LCD screen and alpha-numeric keyboard.
- Adult and paediatric interpretive software.
- Easy selection of traces from 12 x 1, 6 x 2 or the popular 4 x 3 plus rhythm strip one page report.
- On-screen trace preview, lead test and lead-off indication.
- One touch automatic or instant real time operation.
- Internal memory for up to 45 stored ECG records.
- All parameters easily programmed through the LCD screen menu.
- SVGA output for external colour monitor connection.
- High quality digital filters for clear traces (mains, base line and muscle tremor).
- Dedicated one touch keys for storing, printing and transmitting.
- Easy-load paper tray (220 A4 pages).
- Upgradeable Thrombolysis Indication, please enquire for full details.
- Optional communication module (built-in Lan and modem connections).
- Mains/rechargeable battery operation.
- Supplied complete with mains cable, patient cable, pack of z-fold paper, 500 disposable electrodes and alligator clips.
- Dimensions: 330 x 381 x 76 mm. Weight: 5 kg.

seca

Seca CT8000L interpretive £1932.00+VAT

- All the features of the CT-8000P without on-screen trace preview.

Optional extra: 460

Seca 657 £1646.00+VAT

Electronic scales with large platform for trolleys or stretchers on wheels, with integrated transport castors. Supplied with ramps (2 x seca 470), mains powered.

Capacity: 300 kg

Graduation: 100 g < 200 kg > 200 g

Functions: pre-TARE, TARE, HOLD, BMI, damping system

Optional extras: 460 & 472

Seca 675 £889.00+VAT

Electronic platform scales with high load-bearing capacity and castors for transport, mains powered.

Capacity: 300 kg

Graduation: 100 g < 200 kg > 200 g

Functions: pre-TARE, TARE, HOLD, BMI, damping system.

Optional extras: 460, 472 & 470

Seca 645 £800.00+VAT

Large handrail scales for multifunctional use, high load-bearing capacity and BMI function, mains or battery powered.

Capacity: 300 kg

Graduation: 100 g < 200 kg > 200 g

Functions: Automatic switch-off, pre-TARE, TARE, HOLD, BMI, damping system

Optional extras: 460 & 223

Accessories for Multifunctional & Wheelchair Scales

Capacity: 3 kg

Graduation: 1g

BMI calculator

Seca 491 £25.00+VAT

Battery and solar operated, quick and easy determination of BMI.

Seca mBCA 515

Seca mBCA - Where BMI stops, the medical Body Composition Analyzer (mBCA) takes over. Up until now, a doctor's assessment of a patient's general health was a calculation with many unknowns. After all, the Body Mass Index (BMI) is based only on weight and height.

What about the portions of fat, muscle and water?

They too are important indicators of overall health status.

Capacity: 300 kg

Division: 50 g

Calibration class: III

Medical Device class: IIa

Dimensions (WxHxD): 984 x 1209 x 850 mm

Display type: 8.4" touch-screen display, can be rotated 360°

Interfaces: 360° wireless (wireless), USB 2.0, Ethernet

Measurement method: 8-point bioelectrical impedance analysis

Measurement current: 100 µA

Measurement time, normal mode: max. 20 seconds

The six modules in the seca mBCA 515

Development/Growth

Health risk

Raw impedance data

Please visit www.white-medical.co.uk for the full specification.

DEMO? Please contact us.

Seca analytics mBCA 515

The PC software seca analytics mBCA 115 supplements the mBCA 515 with several practical functions. One of them allows the device to transfer data and measurements wirelessly into any Electronic Medical Record (EMR) system. The software also offers the Cardiometabolic Risk module, a therapy planner for dieting and the option of compiling and printing a patient's examination results. The software output is of great help to the doctor during post-examination consultation.

Bed & Dialysis Scale

Seca 985 £3737.00+VAT

Electronic bed and dialysis scales with integrated mechanical lifters and equipment trolley.

Capacity: 500 kg

Max. patient weight: 250 kg

Graduation: 100 g < 200 kg > 200 g

Functions: TARE, HOLD, BMI, limit value, damping system.

Optional Extra: 435

A&D UW-101NFC £40.00+VAT

Activity monitor (step counter / pedometer) with NFC.

3-axis accelerometer for motion detection.

Activity strength indicator (slow-fast).

No of steps: (0-99999). Calories burned: (0.0-9999.9 kcal). Distance: (0.00-999.99 km).

14 days memory (viewable on activity monitor and for use with data transfer).

Omron COMPAIR PRO C900 **NE-C900-E £79.00+VAT**

OMRON introduces the latest breakthrough in clinical respiratory therapy, the NE-C900 CompAir™ Pro nebuliser. Designed for use in a wide range of clinical applications and to deliver a full range of medications, the NE-C900 CompAir™ Pro nebulizer can be used to effectively treat many common respiratory conditions.

Uses OMRON's unique two-part Smart Structure™ kit

Airflow rate of 7 liters/min at 100 kPa

Provides a high nebulization rate of 0.4 ml/min

Mass Median aerodynamic diameter of 3 microns

Features a durable, high-output compressor

Efficiently delivers medication to the lower airway

Omron COMPAIR C801 **NE-C801S-E £41.00+VAT**

OMRON is complementing its range of compressor nebulisers with the new NE-C801. With a lightweight (approx 270g), handy design and a sound level of 46dB the NE-C801 allows for a very quiet and comfortable operation. The NE-C801 nebkkit also features OMRON's Virtual Valve Technology (V.V.T.) ensuring an efficient drug delivery.

Lightest OMRON compressor nebulizer, approx 270g

V.V.T. nebulizer technology - Low sound level (46dB) - Easy maintenance

Omron COMPAIR C801KD **NE-C801S-KDE £41.00+VAT**

The children's model offers the same features as NE-C801.

Supplied with child and infant masks plus two puppet accessories which can be attached to the nebkkit.

Omron COMPAIR C28P **NE-C28P-E £50.00+VAT**

The powerful compressor nebulizer CompA.I.R. offers everything necessary for an efficient drug delivery.

Short Inhalation time	Efficient lung deposition
Fast and convenient	Long-life compressor
High nebulization rate	V.V.T. nebulizer technology
Waterprotected switch	Handy carry case

Omron COMPAIR Pro C29

NE-C29-E £50.00+VAT

Same specification as C28P with a convenient top storage compartment (no bag).

Omron COMPAIR Elite C30

NE-C30-E £81.00+VAT

Same specification as C28P Small and lightweight. Handy carry care for portability. Rechargeable battery pack and car adaptor available.

Battery pack - £63.00+Vat

Car adaptor - £17.00+Vat

CALIBRATION VALIDATION:

All automatic (oscillometric) monitors should be calibrated within 2 years of purchase, and yearly thereafter. (This is subject only to the manufacturers' own specific recommendations). Manual sphygmomanometers also need to be checked; mercury devices checked annually and aneroid devices twice a year. White Medical can carry out calibration validations with a UKAS calibrated specialised test machine, either at their premises in Rugby or at the customer's site, on request. All types of monitors (digital, mercury & aneroid) can be tested. BPM's sent into White Medical are subject to a standard charge, which includes the calibration validation, function check & minor repairs; (for major repairs we will contact you prior to carrying out any work regarding the extra cost). With off-site calibration validation the cost will be dependent on the number of monitors and the travelling distance. Our Certification of the calibration validation procedure importantly provides the customer with added protection for Liability Insurance purposes and any other potential legal claims. In this context, White Medical adheres to the advice laid out by MHRA who issued Medical Device Alerts (December 2005 and July 2006) together with a Device Bulletin also in July 2006, all of which relate to Blood Pressure Measurement Devices. These should be referred to for their full recommendations.

Calibration Validation per monitor by post:

£20+VAT per unit

Calibration Validation per monitor at customer's site in England:

Please contact us for a quotation on: 01788 553904 or email: service@white-medical.co.uk with your postcode, quantity and monitor type.

WARRANTY & SERVICING:

White Medical has a fully functioning Service Centre, and also an Omron warranty centre, to cater to the requirements of the NHS. We can service and carry out repairs on most small diagnostic products specialising in BP monitors, nebulisers and thermometers. For non-warranty repairs you will be notified of the cost prior to our carrying out any repair work. All products come with a manufacturer's warranty, beginning from the date of purchase and is a replacement/repair warranty. This is only subject to normal wear and tear; but wilful mishandling and other reasonable exclusions are not covered by the warranty, as detailed in the manufacturer's instruction manual, a copy of which is supplied with every machine. Please note that the unit should not be disassembled or repairs attempted as this action will invalidate the warranty terms, and any subsequent repairs will not be covered by the warranty. For warranty claims please consult White Medical Customer Services for advice, or return the unit to them for repair or replacement.

White Medical is quality accredited to ISO9001:2008, ISO13485:2003 and ISO14001:2004. Spares and accessories can be supplied ex-stock and the main consumable items are detailed on the accessories page for each manufacturer. All manufacturers consider that due to high in-company quality standards the main unit should be treated as a non-serviceable part. This is primarily because of the necessity of proper factory calibration after replacement of high-tech components. This means that repairs to the main unit will probably not be cost-effective bearing in mind the low replacement cost of products. White Medical stock most spares for products in our catalogue and also discontinued equipment, specialising in the Omron range of equipment.

TO PLACE AN ORDER:

Telephone: 01788 553904 Fax: 01788 560820 e-mail: enquiries@white-medical.co.uk Online www.white-medical.co.uk.

PAYMENT OF INVOICES:

Payment terms are strictly 28 days after receipt of goods. For personal orders payment is required at time of order, either by cheque or credit/debit card or alternatively on our online store. All prices in this brochure exclude VAT, which must be added at the national rate.

NHS and account holders can make payment by:

- Cheque made payable to White Medical
- BACS (Barclays Bank, A/C Name: White Medical, A/C No: 40784060, Sort Code: 207348)
- Credit / debit card (not AMEX)

PRICES:

Prices are correct at time of print and exclude VAT, prices are subject to change without prior notice.

DELIVERY:

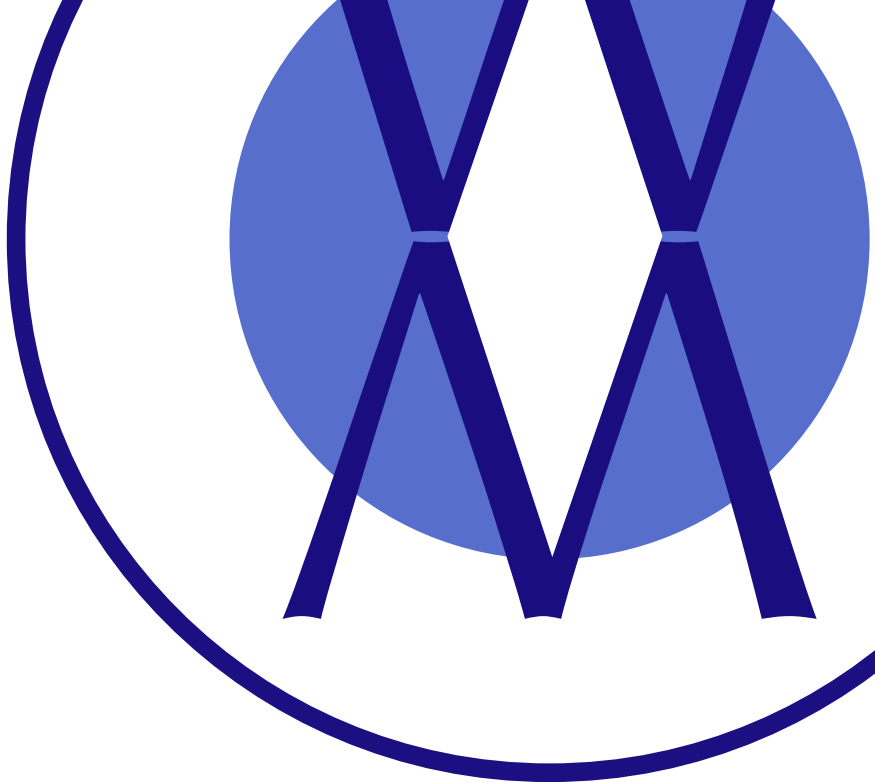

Standard 2-4 day delivery is FREE on ALL orders for stock items. Next working day delivery is available at a cost of £9.95 per order on orders received before 12 noon subject to stock availability. Saturday delivery available at £25.00. Non-stock items (Seca, Edan & Mindray) 7-10 days delivery. Please contact us for stock availability on orders.

TERMS & CONDITIONS OF SALE:

Please read our terms and conditions carefully which are available at www.white-medical.co.uk (electronic copies available upon request), if you have any queries please contact our Customer Services on 01788 553904. White Medical accepts all orders subject to these terms and conditions.
